SAVE ENERGY!!

Functions can also
be used with scale
machines.

2 energy-saving functions

1. Energy saving

- Automatic switch-off the knife drive switches after 15, 30, ... 105 seconds if the carriage is not used.
- LED flashes when Energy is active saving function.
- Pressing the green button switches the knife drive on again.

2. Sub-zero shutdown

The machine switches off the knife drive if the stop plate is closed above zero and the knife is covered.
