

GRAEF presents stylish Handbrew Collection: a must for fans of manual coffee preparation

(Arnsberg, January 2024) The renowned kitchen appliance manufacturer GRAEF is expanding its Coffee World with a series of real highlights for all lovers of manual coffee preparation - the first Handbrew Collection in stylish matte black featuring elegant real wood applications. The collection includes two French press pots in different sizes, the centerpiece for enjoying a quick full-bodied coffee in the morning. The accompanying manual coffee grinder allows you to grind fine or coarse coffee grounds to suit your personal taste. The beautifully designed pour-over kettle with its precise swan neck sets new standards for the traditional hand-infusion method and affords the coffee an incomparable quality. For fans of milk foam creations, the collection also offers two stylish milk frothers that provide the perfect coffee topping. With the introduction of the Handbrew Collection, GRAEF is underlining its commitment to diverse taste experiences in the world of coffee.

For small and large quantities - the MFP12 and MFP22 French press pots

The MFP12 and MFP22 French press models from GRAEF are the perfect choice for those who don't want to wait long for a delicious cup of coffee in the morning. The two pots have a transparent, removable glass container with a metal sleeve and ensure you'll enjoy authentic coffee of the highest quality. The transparent glass allows you to precisely follow the progress of the brewing process and ensure that the coffee has the desired intensity. For easy cleaning, simply remove the container from the metal sleeve, which doesn't just look stylish, but also serves as heat protection. With a capacity of 350 milliliters, the MFP12 is ideal for preparing one to two small cups of brown gold. If you want to prepare larger quantities, we recommend the MFP22. With a capacity of 800 milliliters, it can make five to six cups of coffee - ideal for a family breakfast.

GRAEF

For today. For tomorrow. For you.

Perfect grain size for a delicious coffee

An enjoyable coffee moment starts with the perfect grain size of the ground coffee, and this is where the MCM12 manual coffee grinder shows its full class. With a generous filling capacity of 25 grams of unground beans, it enables the effortless preparation of coarse ground coffee for the French press or fine espresso powder, for example. With no electricity and in just a few simple steps, it grinds the small beans according to your personal requirements thanks to 48 grind settings. The special surface pattern on the housing ensures you'll have a good grip during grinding, and the removable stainless steel grinder makes cleaning child's play.

Precise infusion with the GK502 pour-over kettle

Hand-filtered coffee continues to be very popular today, as the pour-over method results in a particularly aromatic and personalized coffee experience. With the GK502 pour-over kettle, GRAEF offers the ideal appliance for this coffee preparation process, combining innovative technology with sophisticated design. Equipped with a slim swan neck spout, the GK502 ensures a controlled and even distribution of water over the coffee or tea to achieve the best flavor. Another highlight is the precisely adjustable temperature: Users can individually set the ideal brewing temperature for their favorite drink - from 40 °C to 100 °C - and check it at any time thanks to the LED display showing the temperature and brewing time. The brew timer and keep-warm function also give you maximum control over the brewing process and ensure that the brewed beverage always remains at the desired temperature. Its elegant GRAEF-design stainless steel housing and stylish swan neck spout make the kettle a real eye-catcher in any home.

Perfect milk foam in just a few simple steps

To finish off the aromatic drink with a frothy topping, the Handbrew Collection from GRAEF is completed with the MMS12 manual milk frother and the MS902 glass milk frother with induction technology. With a high-quality finish and durable materials, the MMS12, with a filling capacity of around 200 milliliters, makes it easy to prepare perfect milk foam for two cappuccinos or a latte macchiato, for example, in just a few simple steps. Thanks to its user-friendly operation, preparing milk foam takes no time at all, with no complex settings or complicated operating instructions. Like the French press pots, it also has a transparent glass container so that users can keep an eye on the foaming process and achieve the desired consistency. The compact design of the milk frother also ensures it doesn't take up much space when stored. If you don't want to prepare your milk foam by hand, simply reach for the MS902. In addition to its many practical features, it is extremely quiet and delivers perfect results thanks to its induction technology.

Press release

About Gebr. GRAEF GmbH & Co. KG:

Founded in 1920, Gebr. GRAEF GmbH & Co. KG from Arnsberg is one of the leading manufacturers of cutting machines for private and commercial use. Since 2022, the family-owned company, now in its fourth generation, has a new brand claim: "For today. For tomorrow. For you." The new claim underlines GRAEF's philosophy and also holds an important message for the future. Thanks to many years of expertise, technological know-how, and absolute passion, GRAEF stands for durable products meeting the highest standards of quality and design. The company's greater vision: to become the most popular and sustainable supplier of cutting technology and kitchen appliances in the market and thereby inspire customers to practice a sustainable lifestyle.

The innovative products of the Arnsberg-based manufacturer have repeatedly set industry standards, especially its universal slicers for private households. The GRAEF company also supports consumers in their daily indulgence with portafilter espresso machines, coffee grinders, kettles, choppers, dehydrators, blenders, an ice cream maker and a multi-grinder. Nationally and internationally, its products are known for high-quality workmanship, durability, user-friendliness and sophisticated design. They have been awarded the most coveted design prizes many times and repeatedly achieved top marks in product tests. Since 2004, GRAEF has been named "Brand of the Century" multiple times – most recently in 2022, after already receiving the Plus X Award for "Best Brand of the Year 2020" and the Plus X Award for Sustainability in 2022. Also in 2020, the kitchen appliance manufacturer collected the most Plus X Award seals of approval within its product group and was named "Most Innovative Brand 2020."

GRAEF

For today. For tomorrow. For you.
