

MASTER

GRAEF.

For today. For tomorrow. For you.

SCALELIGHTING

A PLUS IN SAFETY AND A MINUS IN ENERGY CONSUMPTION

- Red light for the open blade, green for the secured blade edge
- Automatic switch-off when not in use
- Immediate automatic switch-off of the blade drive after closing the limit stop

PRO
WORLD.

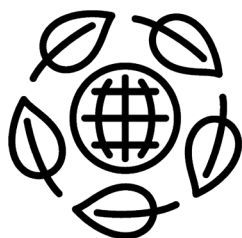

Now available as an option for the models MASTER 3020, 3310, and 3370!

MASTER

GRAEF

For today. For tomorrow. For you.

Save even more energy!

THE TWO ENERGY-SAVING FUNCTIONS

1. ENERGY-SAVING

- Automatic switch-off of the blade drive when the carriage is not in use after 15, 30, ... 105 seconds.
- LED flashes when the energy-saving function is active.
- Switch the blade drive on again by pressing the green button.

Functions can also be used with weighing machines.

2. SUBZERO SWITCH-OFF

- The machine switches off the blade drive when the stop is closed beyond zero and the blade is thus covered.
